Summary

Motivated cybersecurity fresher with a strong interest in cybersecurity. Eager to learn, develop technical skills, and contribute to protecting systems, networks, applications, and data through effective security practices.

Education

Sri Ramachandra Faculty of Engineering and Technology, Chennai

Aug 2022 – Aug 2026

B.Tech Computer Science Engineering [Cybersecurity & IoT]

- CGPA: 9.03

Experience

Cybersecurity Intern, RELA Hospital – Chennai, India

Aug 2024 – Oct 2024

- Developed a Secure Hospital Database Management System independently using HTML, CSS, JavaScript, PHP, and MySQL, integrating AES encryption to protect sensitive patient data.
- Ensured data confidentiality, system reliability, and followed security best practices in the application.

Projects

Voice-Controlled Humanoid Robot

Jan 2023 – Mar 2023

Internet of Things

- Led a team of three to design and build a voice-controlled humanoid robot using IoT, Arduino Uno, and C, with a focus on automation and safety.
- Presented the project's design rationale and real-world impact to faculty and peers.

AI-Driven IDS using Hybrid ML and Explainable AI

Feb 2026 – Apr 2026

Cybersecurity

- Developed a hybrid machine learning-based Intrusion Detection System (IDS) using XGBoost and SMOTE on the CIC-IDS2017 dataset for detecting DoS/DDoS attacks
- Integrated SHAP TreeExplainer for explainable AI, identifying top discriminative network features across 78 traffic attributes.

Skills

Programming: Python, SQL

Web: HTML, CSS, PHP, JavaScript

Security Tools: Nmap, Wireshark, MobSF

Networking Concepts: TCP/IP, OSI Model, DNS, HTTP/HTTPS, IP Addressing, Network Protocols

OS: Linux (Ubuntu, Kali), Windows

Version Control: Git, GitHub

Phishing Simulation: MaxPhisher, CamPhisher

Certifications

CEH v13

ISC2 CC – Domain

Languages

English, Tamil, Telugu, Hindi
